

MOHAMED SABER

Full-Stack Developer | ASP.NET Core & Angular Specialist

Mansoura, Egypt | 01022812243 | dev.mohamed104saber@gmail.com | [LinkedIn.com/in/Mohamed-Saber](https://www.linkedin.com/in/Mohamed-Saber) | [GitHub.com/Mohamedsaber2004](https://github.com/Mohamedsaber2004)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience building scalable RESTful APIs and responsive single-page applications using ASP.NET Core, C#, Angular, and TypeScript. Skilled in Clean, Onion, and N-Tier Architecture patterns alongside CQRS (MediatR). Proven success integrating AI APIs (ChatGPT-4o-mini), payment integrations (Stripe, Paymob), and real-time communication (SignalR, Firebase). Track record of measurable impact: 20% faster API response times, 40% improved database execution, 90% reduction in unauthorized access, and 30% reduction in manual workload through AI-driven automation. Strong foundation in SQL Server, EF Core, Redis, OAuth 2.0/JWT security, and Agile delivery.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: .NET (ASP.NET Core, EF Core), Angular, Bootstrap

Architecture & Patterns: Clean, Onion, and N-Tier Architecture, CQRS (MediatR), Repository Pattern, Unit of Work, SOLID Principles

Databases & Caching: SQL Server, Redis, Firebase (FCM)

Security & Integrations: OAuth 2.0, JWT Authentication, ASP.NET Identity, ChatGPT API, SignalR

Payments: Stripe, Paymob

DevOps & Tools: Git, GitHub, MSDeploy, Swagger/OpenAPI

Practices: Agile, Unit Testing (NUnit), FluentValidation, AutoMapper, RESTful API Design

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Quad Insight

10/2025 - 04/2026 | Remote

- Collaborated with cross-functional teams to architect scalable RESTful APIs and Angular frontends for pet-tech platforms using clean, layered design principles.
- Integrated ChatGPT-4o-mini for automated medical diagnosis, reducing manual assessment time by an estimated 30% through real-time AI logic.
- Redesigned UIs during agile UX sprints, translating complex designs into responsive components that improved user engagement metrics by 15%.
- Enhanced application security and reliability by implementing secure OAuth/JWT flows and managing multi-environment CI/CD deployments.

Front-End Engineering Trainee - ITI

07/2025 - 10/2025

- Leveraged problem-solving skills to build high-performance SPAs using Angular and TypeScript.
- Applied advanced component-based design during the D2D Hackathon, contributing to production-ready interfaces (see D2D Car E-Service System below).

Back-End .NET Developer Intern - Route Academy

10/2024 - 05/2025

- Optimized LINQ queries and SQL indexing, reducing API response times by 20% and improving database execution by 40%.
- Maintained 85% code coverage using NUnit; applied modular design principles to improve code reusability by 30%.

- Demonstrated strong technical communication by documenting backend technical designs and participating in code reviews.

KEY PROJECTS

- **Veticare** (.NET, ChatGPT-4o-mini): Developed an AI-driven medical assessment module for a pet-tech platform. Integrated automated messaging to streamline clinic operations.
- **Dakkn** (ASP.NET Core 8 MVC, Clean Architecture, CQRS/MediatR, SQL Server): Built a bilingual (Arabic/English) e-commerce platform for premium vinyl stickers with role-based access and dual JWT/cookie authentication. Implemented soft-delete data auditing across a 5-layer solution.
- **ClinicHub** (ASP.NET Core Web API, Clean Architecture, CQRS/MediatR, SQL Server): Engineered a clinic-management API with geo-spatial clinic search (NetTopologySuite) and Paymob payment integration. Added Pusher real-time notifications and Google/Facebook OAuth, structured across Domain, Application, Persistence, and Infrastructure layers.
- **Smart Task Management System** (ASP.NET Core 8, Clean Architecture, CQRS/MediatR, AutoMapper, FluentValidation): Designed a scalable task-management backend applying Repository, Unit of Work, Strategy, and Decorator (pipeline behavior) patterns. Standardized API responses with full Swagger documentation.
- **Squeak** (SignalR, Firebase Cloud Messaging (FCM)): Implemented real-time communication via SignalR and FCM to increase user interaction frequency. Developed a QR-based vaccination tracker.
- **Rafeek** (.NET, CQRS): Built a student management API with an AI-driven scheduling engine for academic timetables, ensuring optimized resource allocation through CQRS pattern separation.
- **E-Commerce Management System** (ASP.NET Core Web API, Onion Architecture, Redis, ASP.NET Identity): Built a scalable e-commerce backend with product catalog, shopping basket, and order management. Reduced unauthorized access by 90% via ASP.NET Identity and integrated Stripe for secure transactions. Used Redis caching with the Specification pattern for efficient, paginated queries.
- **D2D Car E-Service System** (Angular 18+, Firebase (Firestore, Auth, Hosting), Leaflet.js): Built a door-to-door car service platform connecting customers, drivers, and technicians. Featured live location tracking, role-based dashboards, and real-time Firestore data sync; delivered during the D2D Hackathon.
- **MyPortfolio** (ASP.NET Core 9 MVC, ASP.NET Identity, AutoMapper): Developed a full-stack personal portfolio site with an admin content-management panel, Google OAuth login, and MailKit-powered contact form. Organized into layered Business Logic and Data Access projects.
- **Car Repairing Service (INANCE)** (HTML5, CSS3, Bootstrap 5): Designed a fully responsive marketing website for an auto-repair business with service showcases, customer testimonials, and Google Maps integration.
- **LifeHub** (HTML5, CSS3, Flexbox/Grid): Built a multi-section responsive personal/business website featuring a gallery, team profiles, pricing plans, and animated statistics counters.
- **HostIT** (HTML5, CSS3): Created a responsive landing page for a web-hosting service with a tailored styling approach and optimized static asset structure.

EDUCATION

B.Sc. in Computer Science (Software Engineering), Mansoura University
Mansoura, Egypt

2026
