PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer specializing in ASP.NET Core and Angular. Expert in building scalable APIs, integrating AI (ChatGPT APIs), and architecting systems with Clean, Onion, and N-Tier Architecture. Proven track record in analytical problem-solving, achieving 20% faster API performance and delivering high-impact user experiences through modern UX practices.

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Quad Insight	2024 – Present
- Collaborated with cross-functional teams to architect scalable RESTful APIs and Angular frontends for pet-tech platforms using Clean Architecture. - Integrated ChatGPT-4o-mini for automated medical diagnosis, reducing manual assessment time by an estimated 30% through real-time AI logic. - Redesigned UIs during agile UX sprints, translating complex designs into responsive components that improved user engagement metrics by 15%. - Enhanced system security and reliability by implementing secure OAuth/JWT flows and managing multi-environment CI/CD deployments.	Remote
Back-End .NET Developer Intern, Route Academy	01/2024 – 12/2025
- Optimized LINQ queries and SQL indexing, reducing API response times by 20% and improving database execution by 40%. - Maintained 85% code coverage using NUnit; applied modular design principles to improve code reusability by 30%. - Demonstrated strong technical communication by documenting backend architectures and participating in code reviews.	
Front-End Engineering Trainee, ITI	2024 – 2024
- Leveraged problem-solving skills to build high-performance SPAs using Angular and TypeScript. - Applied advanced component-based design during the D2D Hackathon, contributing to production-ready interfaces.	

EDUCATION

B.Sc. in Computer Science (Software Engineering), Mansoura University	2026
	Mansoura, Egypt

TECHNICAL SKILLS

Languages C#, TypeScript, JavaScript, HTML5, CSS3	Frameworks .NET Core (API/MVC), EF Core, Angular, Bootstrap
Tools & DBs SQL Server, Redis, Firebase (FCM), OAuth 2.0, Stripe, ChatGPT API, Git, Docker, GitHub, MSDeploy	Concepts Clean/Onion Architecture, SOLID, CQRS (MediatR), Agile/Scrum, CI/CD, Unit Testing (NUnit)

KEY PROJECTS

Veticare

- Developed an AI-driven medical assessment module using ChatGPT-4o-mini; integrated secure payments and automated messaging to streamline clinic operations.

Squeak

- Implemented real-time communication via SignalR and FCM, increasing user interaction frequency; developed a QR-based vaccination tracking system.

Rafeek

- Engineered an AI-driven scheduling engine for academic timetables, ensuring optimized resource allocation through CQRS pattern separation.

E-commerce Systems

- Reduced unauthorized access by 90% via ASP.NET Identity and integrated Stripe for secure transaction processing.
